STG - (B1) U.S. Patent (no pre-grant pub.) after Jan. 2, 2001
AB - A sealing system for an acoustic touchscreen includes an elongate gel body
 between the touchscreen and the bezel of a housing onto which the touchscreen
 is mounted. The elongate gel body forms a seal around the perimeter of the
 touch-sensitive area of the touchscreen. A stop element controls and limits the
 amount of compression of the elongate gel body. The resulting seal is highly
 effective in protecting the unexposed parts of the touchscreen (i.e., areas other
 than the touch-sensitive area) from contaminants, especially liquid contaminants,
 at the cost of an acceptably low loss in acoustic signal strength.
